

# The Power of Ideas

## Looking for a Career in Visualization?

**Siemens Corporate Research (SCR)** is one of the world's premier labs for medical imaging. SCR is located in Princeton, USA, and provides a stimulating environment for highly talented and self-motivated researchers. SCR excels in transferring academic research into innovative products, and works in close collaboration with clinical partners. This lab has 250 researchers, 100 administrative staff, and over 150 students involved in hundreds of University, Clinical and Government collaborations. SCR is part of Siemens Corporate Technology, a division comprising 2500+ research scientists in Princeton, Berkeley, Erlangen, Munich, Berlin, Tokyo, Beijing, Shanghai, St. Petersburg and Moscow.

The **Imaging & Visualization GTF** of SCR has several immediate openings for Ph.D. level Research Scientists, and BS/MS level Software Engineers.

In this position, you will be conducting leading-edge research and development in activities involving: large volume visualization, segmentation, deformable registration, fusion, image processing, 3D/4D visualization, content extraction and modeling, interventional imaging, parallel computing, and computer graphics.

**Please send your CV to:**

**Gianluca Paladini**, Program Manager
